DIRECTORY of COMMON SERVICE FACILITIES

DIRECTORY
OF
COMMON SERVICE FACILITIES

2006 Edition

FOREWORD

The growth and promotion of the SME sector - the backbone of the Philippine economy - tops the President's 10-point agenda for economic development. In line with this, the Department of Trade and Industry (DTI) was tasked to map out a three-year program, the National SME Agenda, that will pool together key players in SME development into an integrated and comprehensive support system for SMEs. The system encompasses the whole enterprise development cycle and is composed of five linked elements: financing, HRD and training, marketing, product development, and advocacy. In order to sustain the gain of the National SME Agenda, the SME Development Plan for 2004 – 2010 was crafted.

The Plan aims to develop a vibrant SME sector that will provide a strong domestic supply base for globally competitive industries. In line with SME Information Support as contained in the Plan, the Bureau of Small and Medium Enterprise Development (BSMED) has been publishing and disseminating information materials for SMEs to promote their growth and development.

This directory provides vital information on existing common service facilities nationwide which SMEs may tap to help increase their output and boost their competitiveness. The scope of services covered includes:

- Machinery and equipment
- Raw materials procurement
- Product research development and quality control
- Storage/warehousing
- Trade consolidation and provision of display centers
- Business incubation services
- Skills training
- Other services

Particularly, this directory contains the name of the facility, its location, the name of its owner/contact person, the services offered, equipment provided by the facility, and sectors serviced.
